**3. Additional Capacity**

By reactivating a plant previously earmarked for dismantling, it is hoped that the refining capacity will be increased after 1 January 1953. The newly-activated plant should result in an increase of some 3,000 tons.

**4. Staff Changes**

Director Dr. Eckhardt left Luetzkendorf at the end of August to take up the position of Technical Director at Boehlen. His place has not yet been filled and Dipl. Ing. Dassow is acting as director pending a new appointment. Two new appointments have been made recently: Unger (fnu), as Personnel Director, and Bifler (fnu), as Arbeitsdirektor. Both are strong Communists and closely associated with the SSD representative at the plant, Schwarz, (fnu).
